## PROJECTS

### Image Background Remover | [Link](#) | June-July 2023

- Developed an interactive website for image background removal using HTML, CSS, and JavaScript. The site enables users to upload images, which are then processed using the “remove.bg” API to remove the background.
- The website includes a feature that allows users to download the processed image directly to their local device. It is designed to be responsive and user-friendly across multiple devices, including desktops, laptops, tablets, and mobiles.

### Weather website | [Link](#) | December 2023

- Developed a responsive weather website using HTML, CSS, and JavaScript that provides real-time weather updates.
- The site includes a search functionality for users to input their location and retrieve weather data, and a dynamic display that shows current weather conditions.

### Full stack Quiz website | [Link](#) | November 2023 – January 2024

- Developed “QuizGuru”, a real-time, full-stack website using HTML, CSS, and JavaScript for the frontend, and Node.js with Express.js for the backend. The MongoDB database securely stores user login information and quiz bits.
- “QuizGuru” provides various quizzes on different topics, a user-friendly interface, real-time score updates, and user authentication with login and signup features.
